

2019 Community Health Needs Assessment

Mercy Health Cincinnati (Includes The Jewish Hospital, Mercy Health – Anderson Hospital, Mercy Health – Clermont Hospital, Mercy Health – Fairfield Hospital, and Mercy Health – West Hospital)

Mercy Health has been committed to the communities it serves for nearly two centuries. This long-standing commitment has evolved intentionally, based on our communities' most pressing health needs.

Every three years we evaluate those needs through a comprehensive Community Health Needs Assessment (CHNA) process. The most recent assessments, completed by Mercy Health and community leaders, include quantitative and qualitative data that guide both our community benefit and strategic planning.

The following document is a detailed CHNA for Mercy Health Cincinnati, including The Jewish Hospital, Mercy Health – Anderson Hospital, Mercy Health – Clermont Hospital, Mercy Health – Fairfield Hospital, and Mercy Health – West Hospital. As a system, Mercy Health is dedicated to our Mission of extending the compassionate ministry of Jesus by improving the health and well-being of our communities and bringing good help to those in need, especially people who are poor, dying and underserved. We strive to meet the health needs of our community.

Mercy Health has responded to community health needs as part of a three-year strategic plan that concludes in 2021. In recent years, Mercy Health has invested in building and renovating hospitals and ambulatory facilities to serve patients and communities in Ohio and Kentucky.

As part of Bon Secours Mercy Health, the fifth-largest Catholic health system in the U.S., we contribute nearly \$2 million per day in community benefit services as we carry out our Mission of extending care to the poor and underserved.

Mercy Health Cincinnati has identified the greatest needs in our community. This ensures our resources for outreach, prevention, education and wellness are directed toward opportunities where the greatest impact can be realized.

Written comments regarding the health needs that have been identified in the current CHNA should be directed to <https://www.mercy.com/global/about-us/contact-mercy-health>.

“For nearly two centuries, Mercy Health - Cincinnati has provided the high-quality, compassionate and advanced care,” said Dave Fikse, president, Mercy Health – Cincinnati. “Since our founding, we have remained agile to respond to the ever-changing needs of our community.”

Progress on 2016 CHNA

Introduction

JOINT CHNA

§1.501(r)-3(b)(6)(i)

This is a “joint CHNA report,” within the meaning of Treas. Reg. §1.501(r)-3(b)(6)(v), by and for Mercy Health Cincinnati, including The Jewish Hospital, Mercy Health – Anderson Hospital, Mercy Health – Clermont Hospital, Mercy Health – Fairfield Hospital, and Mercy Health – West Hospital. This report reflects the hospitals’ collaborative efforts to conduct an assessment of the health needs of the community they serve. That assessment included seeking and receiving input from that community.

COMMUNITY SERVED BY HOSPITAL

T.R. §1.501(r)-3(b)(1)(i) and (3)

Mercy Health Cincinnati participated alongside regional health partners and hospitals to develop the 2019 Community Health Needs Assessment (CHNA). Hospital members of the Health Collaborative and Greater Dayton Area Hospital Association (GDAHA) joined the collaboration which resulted in a robust portrait of the larger Southwest Ohio region. The report covers Greater Dayton and Greater Cincinnati, which includes Northern Kentucky and Southeastern Indiana.

Mercy Health Cincinnati services the Greater Cincinnati area through its five hospitals with an emphasis on communities immediately surrounding its care sites. It strives to ensure all community residents have access to the care they need, when they need it, regardless of financial capacity and social circumstance.

- The Jewish Hospital predominantly serves residents of ZIP code 45236 and contiguous ZIP code areas, which include portions of Hamilton and Warren counties, and parts of Butler and Clermont counties.
- Anderson Hospital predominantly serves residents of ZIP code 45255 and contiguous ZIP code areas, which include portions of Hamilton and Clermont counties, as well as parts of Brown County.
- Clermont Hospital proudly serves Hamilton, Clermont, Adams, Brown and Highland County and surrounding areas. The vast majority of patients reside in ZIP code 45103 and contiguous ZIP code areas.
- Fairfield Hospital serves residents of ZIP code 45014 and contiguous ZIP code areas, which include portions of Butler and Hamilton counties.
- West Hospital primarily serves Hamilton County and those within the 45211 ZIP Code and its surrounding area.

Information and Data Considered in Identifying Potential Need

T.R. §1.501(r)-3(b)(1)(ii) and (5)

Information and data sources: federal, state or local health or other departments or agencies; community input

Table 1

Public health departments (T.R. §1.501(r)-3(b)(5)(i)(a))	Date of data/information
Adams County Health Department Brown County Health Department Butler County Health Department Champaign-Urbana County Department Cincinnati Health Department City of Hamilton Health Department Clark County Combined Health District Clermont County Public Health Clinton County Health Department Darke County General Health District Fayette County Public Health Greene County Public Health Hamilton County Public Health Highland County Health Department	Meeting dates below reflect group convenings with the Southwest Association of Ohio Health Commissioners and derivative workgroup meetings focused on CHNA input and alignment. 6/23/17 8/25/17 10/26/17 11/16/17 11/28/17 3/30/18

The CHNA Team also received survey responses from all County Health Departments plus local Health Departments in City of Cincinnati, City of Hamilton, City of Middletown, City of Norwood, and City of Springdale.

Table 2

At-risk populations (T.R. §1.501(r)-3(b)(5)(i)(b))	Date of data/information
African Americans	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.
Elderly residents	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.

Latino residents	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.
LGBTQ+ residents	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.
Refugees from Rwanda	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.
Urban residents	Smaller focus group settings and intentional outreach for consumer surveys throughout data collection period; throughout 2018.

Process and methods

Process for gathering and analyzing data/information
T.R. §1.501(r)-3(b)(6)(ii)

Process and methods to conduct the community health needs assessment:

T.R. §1.501(r)-3(b)(6)(ii)

Numerous qualitative and quantitative data methods were leveraged to identify, collect, interpret, and analyze data. CHNA Consultants sought data that reflected recent as well as emerging issues by people who lived in the hospitals' service areas, with attention to vulnerable populations and social determinants of health.

Primary data from meetings and surveys was collected from April through July of 2018. The technique of discourse analysis was used to categorize comments, sort and count them, and calculate how often ideas were repeated. Secondary data started with the resources of County Health Rankings with additional data from reputable national and state sources in Indiana, Kentucky, and Ohio.

The process included an oversampling of vulnerable populations including African Americans; Elderly residents; Latino residents; LGBTQ+ residents; refugees from Rwanda; and urban residents. Community Need Index scores were utilized to identify the likelihood of healthcare disparities at the ZIP Code level for all ZIP Codes in 25 counties.

Note, secondary data provided information about demographics, health conditions, and health-related issues as of 2016. Primary data naturally reflects the opinions and attitudes of individuals and agencies motivated to attend a meeting or complete a survey.

External sources

Several secondary data sources were utilized in the compilation of the CHNA. Standards for researching and including secondary data were as follows:

- Comparable: Measures that could be compared, in all three states, to benchmarks such as Healthy People 2020 or state/national rates
- Geographically specific: County-level data available (ZIP Code level preferred but rare)
- Outcome-oriented: Focus on health outcome data (preferred over subjective survey data when both were available)
- Reproducible: New update available within three years or at 3-year intervals vs. one-time statistic
- Reputable: Retrieved from reputable data sources
- Timeframe: Trend data available (more than one data point; 3-5 years preferred)

These sources include:

Collaborating partners

The hospital collaborated with the following organizations as part of the process of conducting the needs assessment:

- 35 hospitals across Greater Dayton and Greater Cincinnati
- 28 local health departments serving Greater Dayton and Greater Cincinnati (see Table 1)
- More than 1,400 healthcare consumers
- Organizations and non-profits serving the needs of residents across 25 counties in the Greater Cincinnati/Dayton area (see Table 3)

The collaborative process was managed through entities working closely together: The Health Collaborative (lead agency); the Greater Dayton Area Hospital Association; and Public Health - Dayton & Montgomery County (secondary data collection for Ohio counties).

The Health Collaborative (THC) is a non-profit organization based out of Cincinnati, OH that leads data-driven improvements that result in healthier people, better care and lower costs. THC conducted a comprehensive and collaborative assessment for the healthcare systems and hospitals. The lead consultant assembled a team of four sub-contractors to assist her. Both THC and the Greater Dayton Area Hospital Association (GDAHA) managed the relationships and signed agreements with their respective member hospitals. The lead consultant initiated the connection with the Southwest District of the Association of Ohio Health Commissioners (AOHC), and both she and THC representatives attended six AOHC meetings. The lead consultant worked with the Director for the Southwest District of AOHC and Health Commissioner of Preble County to incorporate AOHC's requests and ensure smooth communication.

The scope of work included these deliverables:

- Primary data gathered via community meetings in 25 counties and via hard-copy and electronic surveys, with emphasis on identifying the needs of vulnerable and underserved populations.
- Collection of more than 140 secondary data measures for 25 counties.
- Conduct quarterly meetings with representatives of 35 hospitals.
- Attend meetings and coordinate efforts with the Director for the Southwest District of AOHC.
- Analysis and interpretation for each county as well as for the region.
- Write a comprehensive Community Health Needs Assessment report that consolidates all data and reflects the region's most pressing issues.
- Perform project management and supervision of subcontractors.

Other sources

In addition to the input and data collected through the Regional Community Health Needs Assessment, Mercy Health Cincinnati incorporated relevant findings from the State Health Needs Assessment and State Health Improvement Plan planning process and County collective impact initiatives focused on known need areas, specifically the annual report and five-year strategic plan for Cradle Cincinnati, Hamilton County’s infant mortality reduction task force.

Community input

T.R. §1.501(r)-3(b)(6)(iii)

No written comments were received on the previously completed CHNA.

Community input was received through a series of community meetings and surveys.

From April to July 2018, there were 42 meetings, held in 23 counties, which attracted representatives of community organizations, the general public, and/or members of medically underserved and vulnerable populations—to identify barriers to care (financial and non-financial), give input for current needs assessment, prioritize issues, and identify resources to address health and health-related issues. A total of 440 people (unduplicated) attended 42 meetings. Of these, 283 were speaking on behalf of an organization; 127 were individuals representing their own point of views; 17 represented themselves and an organization; and 13 did not check either box to identify if they were attending as an individual or representing an agency.

Additionally, online surveys were distributed throughout the Region cataloguing responses from individuals (828), agencies (96), and public health departments (28). The CHNA team used SurveyMonkey (Gold) for tracking responses at meetings, interviews, and surveys creating custom tags for each response.

Organization providing input	Nature and extent of input	Medically under-served, low-income or minority populations represented by organization
Adams Brown Community Action Partnership	Agency survey collected in 2018	All
Alzheimer's Association Miami Valley	Community Meeting in 2018	Population at large

Big Brothers Big Sisters of Greater Cincinnati	Community Meeting in 2018	Population at large
Butler County Health Department/ Health District	Agency survey collected in 2018	African American, low income, lower education
Cancer Justice Network	Community Meeting in 2018	Population at large
Caracole	Community Meeting in 2018	Population at large
CareSource	Community Meeting in 2018	Population at large

Welcome House Street Outreach	Community Meeting in 2018	Population at large
Whole Truth Ministries	Community Meeting in 2018	Population at large
WinMed Health Services	Community Meeting in 2018	Population at large
Women Helping Women	Community Meeting in 2018	Population at large
YMCA of Greater Cincinnati	Agency survey collected in 2018	Minorities
YWCA	Agency survey collected in 2018	children

Executive summary: Significant health needs

T.R. §1.501(r)-3(b)(4)

Significant health needs

There were several different source materials incorporated into the CHNA process: Meeting responses; Consumer survey responses; Agency survey responses; Health Department survey responses; and secondary data for more than 140 publicly available measures.

Common themes were expressed throughout all source materials as was consensus across categories. Many of the priorities identified three and six years ago still concerned Tristate residents and organizations. The most striking difference from 2013 to 2016 was the increased attention to, and severity of, the heroin and prescription drug abuse problem in the region. For this 2019 report, public awareness has become even more sophisticated and focused on the myriad and complex array of

connected issues. There were more comments about addiction of all types; underlying mental health issues; the impact of trauma; lack of mental health providers; need for more access to treatment; and the toll of addiction on communities and families, especially children whose parents had a fatal overdose. These themes echoed throughout the comments from all primary data sources. Substance abuse and Infant mortality were the two topics most cited as areas where there was meaningful and visible community collaboration. At the same time, respondents explained that while the progress was good, much more needed to be done.

The table below summarizes the most significant health needs by source. Significance is determined by consensus across categories. The needs are sorted in descending order according to average placement, where 1 = first place, and 10 = tenth place. For the community meetings, the top votes (measured by number of dots) determined the priorities at the county and regional level. For the survey results, the regional priorities were the issues receiving the most overall mentions. At the county level, the priorities were sorted by county of residence/service. The threshold for including a priority was 5% or more of all mentions, or at least two mentions. For comparison purposes, priorities were rank ordered with the top priority listed first in the column.

Five issues appear across all five sources of input (four primary sources plus the secondary data) and were identified as the significant health needs of the hospital communities; these were:

- Substance abuse (2.2) (e.g., abuse of alcohol and/or drugs)
- Mental health (3.2) (e.g., depression, suicide, lack of providers, # of poor mental health days)
- Access to care/services (3.8) (e.g., cost, insurance, lack of providers, transportation)
- Chronic disease (4.4) (eg., cancer, diabetes, heart, respiratory diseases, stroke)
- Healthy behaviors (6.4) (e.g., doctor visits, exercise, quit smoking, self-care, weight loss)

TABLE 27. REGION: COMBINED TOP PRIORITIES OF PRIMARY AND SECONDARY DATA
(in descending order)

Meetings	Consumers	Agencies	Health Departments	Secondary Data
Access to care/services	Substance abuse	Substance abuse	Substance abuse	Injury deaths
Social determinants of health (especially Discrimination)	Chronic disease	Mental health	Mental health	Access to care: Lack of providers (Mental health; Dental; Primary care)
Mental health	Mental health	Access to care/services (esp. cost, specialty care/ services, transportation)	Chronic disease	Chronic disease (esp. cancer; diabetes; heart; respiratory; stroke)
Substance abuse	Obesity	Chronic disease (esp. diabetes; cancer; heart)	Obesity	Substance abuse (esp. binge drinking; drug poisoning; heroin poisoning overdose)
Parenting/Families	Access to care/services	Infant mortality	Care for children	Healthy behaviors (esp. drinking, smoking, obesity, physical inactivity)
Healthy behaviors	Healthy food/Nutrition	Obesity	Healthy behaviors	Mental health (esp. poor mental health days; suicide; depression)
Healthy food/Nutrition	Healthy behaviors	Healthy food/Nutrition (esp. nutrition)	Maternal & child health / Infant mortality	Infant mortality
Health education /Promotion		Healthy behaviors (esp. smoking/tobacco)	Access to care/services	Food insecurity
Care for children		Care for children		Motor vehicle crash deaths
Chronic disease				Children in poverty

Prioritization of health needs

Regional priorities were determined by consensus ranking between the primary data responses and the supporting statistics. The prioritized health needs were collectively convened and approached by theme. Priority is determined by ranking, which is reflective of the average. For primary data, the number of votes in community meetings and the number of mentions on surveys were tabulated. For secondary data, a set of criteria were applied to determine which health and health-related issues were regional priorities. These criteria included:

- Regional rates lagging state and/or national rates
- Worsening trend
- Risk factor for serious disease
- Local rates not meeting national targets of Healthy People 2020
- Measure is a state priority

The five issues that appear as the region's top priorities overall are those with consensus across all five sources of input (four primary sources plus the secondary data). The five identified priorities ranked in the top 8 for all primary and secondary data sources (meetings and survey from consumers, health departments, and agencies). These priorities are key findings of the CHNA report because they show the areas of agreement between secondary data and all sources of primary data for the region. In addition, infant mortality reinforced as pressing community health need and key area of continued focus for Mercy Health and its collaborative partners. Infant mortality ranks as one of the top priorities in the Ohio Department of Health's State Improvement Plan and is shared by City and County Health Departments in Mercy Health's Service area. Despite significant progress, it continues to be an ongoing challenge for both the state of Ohio and City of Cincinnati with Ohio currently ranking 43rd out of 50 states for infant deaths per 1,000 live births.

These prioritized needs are discussed in greater detail below.

Prioritized health needs

Based on all of the above information and processes, the prioritized health needs of the community are listed below.

SUBSTANCE ABUSE

Although Substance Abuse Disorder is a mental health diagnosis, the volume of responses indicated that substance abuse remain a separate category related to the use and abuse of illegal drugs, prescription drugs, alcohol, and addiction in general. Comments about the impact of alcohol on society and families recurred in meetings and on surveys. Multiple people asked for less concentration on drug specific responses and more approaches that deal with the underlying problems leading to addiction of any kind. The vast majority of responses from surveys or in meetings were the general terms, 'substance abuse,' or 'drug abuse.' Heroin continues to be a source of grave concern throughout the region.

Secondary data supported substance abuse as a priority. Twenty-three counties out of 25 had high rates of drug poisoning deaths; only Ohio County in Indiana had a rate below the national rate of 14.6 deaths per 100,000. Eighteen counties had high rates of binge alcohol consumption, exceeding the national rate of 16.6%. The measure is based on the percentage of the population drinking 5 or more drinks in one sitting (4+ for women). Sixteen counties had high percentages of motor vehicle deaths involving alcohol, above the nation's rate of 30%.

MENTAL HEALTH

Generalized 'Mental health,' was the most common response from the agency surveys. For the first time 'child mental health' was frequently mentioned. Depression was cited most often, followed closely by anxiety. Suicide was openly discussed in several meetings, and it was a priority in both LGBTQ+ meetings. Next most commonly mentioned were mood disorders and ADD/ADHD. Self-

harming came up several times, as did stigma. Trauma and specifically Adverse Childhood Experiences – both the impact of past experiences on adults and the impact on children living through them now. A disturbing trend was the increase in comments about the need for psychiatric hospital beds for children younger than 12.

Related issues included access to mental health providers in the community, insurance for behavioral health treatment, and providers who would accept Medicaid. Secondary data corroborates the lack of providers, and 24 of 25 counties do not have enough mental health providers. Only Hamilton County meets (and exceeds) the national ratio of 1 provider for every 470 people. In Ohio, the ratio is 1 per 561; in Kentucky 1 per 525; and in Indiana 1 per 701.

Other related metrics include depression percentage, suicide rate, and average number of poor mental health days. Eighteen counties have people reporting more than 3.7 days, the national average. Sixteen counties have high suicide rates. The national rate in 2016 was 13.4 deaths per 100,000, and it has increased 28% from 1999 to 2016.2 Ohio's rate was 13.1; Indiana's rate 14.25; and Kentucky's 19.3. Depression rates in Ohio (18.5%), Kentucky (22%), and Indiana (24%) exceed the national rate of 17.1% of the population. Major depressive disorders were among the top 20 most common diagnoses of hospitalized patients in the region.

ACCESS TO CARE

The lack of access to providers was mentioned most often. Including providers being out-of-network for insurance as well as providers located outside the geographic area; and too few specialists. Other barriers and gaps identified included no insurance; inadequate insurance coverage; high deductible plans; affordability of care (co-pay and/or out-of-pocket); cost of medication; can't take time off during working hours; no one to watch children; language barrier; and/or lack of local services (e.g., cancer treatment). Transportation was a total of 7% of all mentions within the Access category.

The secondary data reflects that many counties have provider shortages. Twenty counties have fewer dentists than their state ratios of one dentist per 1,660 (Ohio), 1,561 (Kentucky), or 1,852 (Indiana). Eighteen counties have fewer primary care physicians (PCP) than their state ratios of one PCP per 1,310 (Ohio), 1,507 (Kentucky), or 1,505 (Indiana).

CHRONIC DISEASE

The most common chronic diseases cited were heart disease, cancer, and diabetes. Hypertension was commonly cited, and stroke, allergies, and arthritis were mentioned several times. According to the secondary data, lung cancer and Type 2 Diabetes significantly impact the region. Sixteen counties had high rates of chronic lower respiratory disease deaths for people aged 65 and older. Arthritis, cardiovascular, heart, and respiratory issues were among the top 20 most common diagnoses of hospitalized patients in the region.

HEALTHY BEHAVIORS

This category captured recommendations on building healthy behaviors such as: healthy eating, increasing exercise, quitting unhealthy substances and losing weight. Secondary data supports the public perception of needing to address alcohol intake, physical inactivity, smoking, and/or weight. Twenty-two counties have higher percentages of adults who smoke, compared to the national percentage of sixteen percent. Nineteen counties have more residents who are physically inactive, compared to the national percentage of twenty-five percent. Seventeen counties exceed the national percentage of adults who are obese, nearly thirty percent.

INFANT MORTALITY

In Hamilton County, the infant mortality rate has consistently been worse than the U.S. average. Babies who are born alive but die (for any reason) before their first birthday, contribute to a community's infant mortality rate. Main contributors to Hamilton County cause of infant death from 2014 to 2018 are 57% extreme preterm birth, 22% birth defects, 13% sleep-related, and 8% other including homicides, infections accidents or other causes. In 2018, fewer babies died than ever in Hamilton County history. While this indicates progress, the reality remains that the total number of deaths still far exceeds the U.S. average. Moreover, the stubborn disparity between Black outcomes and White outcomes in Hamilton County has continued with black families experiencing infant mortality rates nearly three times that of white families. As such, Infant Mortality remains a prioritized health need and area of critical focus for health equity and disparity reduction.

Capacity and adequacy of service levels to address prioritized health needs

MENTAL HEALTH AND SUBSTANCE ABUSE

While uniquely identified and separately discussed as part of the needs assessment and prioritization process, provider support for both mental health and addiction services are reflected within the mental health category. 24 counties in the region had low numbers of mental health providers for their residents. The rate of people served by one provider ranged from 415 in Hamilton County to 7,250 in Union County, IN. The national rate was 1 provider per 470 residents. The state ratios were all high: Indiana at 1 per 701 people; Kentucky at 1 per 525 people; and Ohio at 1 per 636 people. The average of all three states (Ohio, Indiana and Kentucky) equated to a rate of 1 mental health provider per 613 people.

Please see appendix for Table 1. Mental Health Providers Ratio to Residents by County

Current service providers

Relevant service providers in the Hospitals' community include Bethany House, Addiction Services Council, Life Point Solutions, Clermont County Mental Health and Recovery Board, and Child Focus Inc. See Table 5. List of Community Resources for a complete list of resources throughout the geographic

area. Mental health and substance abuse remain as a high need category with limited available resources to address.

ACCESS TO CARE

Access to care as a priority represents a perceived shortage in necessary services for area residents. Comments in this category also provided insight into the financial and nonfinancial barriers to care including health insurance and transportation. Of specific concern was dental access. 20 counties in the region had low numbers of dentists for their residents. The rate of people served by one provider ranged from 1,210 in Greene County to 6,250 in Brown County. The average of all three states was 1 dentist per 1,691 people. The state ratios were all high: Indiana at 1 per 1,852 people; Kentucky at 1 per 1,561 people; and Ohio at 1 per 1,660 people.

Please see appendix for Table 2. Dentists Providers Ratio to Residents by County

Current service providers

Relevant service providers include Cincinnati Works, First Ladies Family Health, Health Care for the Homeless, Norwood Health Department, and People Working Cooperatively. See Table 5. List of Community Resources for a complete list of resources throughout the geographic area. Access to Care continues to be an opportunity for both rural and urban geographies to which strategies are augmented to address.

CHRONIC DISEASE

Chronic disease can be effectively managed with early and appropriate access to preventative services and ongoing care management. 18 counties in the region had low numbers of primary care physicians for their residents. The rate of people served by one provider ranged from 920 in Hamilton County to 10,424 in Switzerland County, IN. The average of all three states was 1 primary care physician per 1,441 people. The state ratios ranged from 1 PCP for 1,310 people in Ohio to 1 PCP for approximately 1,500 people in Indiana and Kentucky.

Please see appendix for Table 3. Ratio of Primary Care Physicians to Residents by County

Current service providers

Relevant service providers include Cancer Family Care, Cincinnati Health Department, Hamilton County Public Health Department, Northside Health Center and Prevention First Coalition. See Table 5. List of Community Resources for a complete list of resources throughout the geographic area. Significant numbers of residents' have chronic disease. Cardiovascular disease and obesity affect more residents than any of the other chronic diseases. Many programs and organizations work to

provide treatment and prevention, but chronic disease remains a major problem for the health of our community.

HEALTHY BEHAVIORS

Healthy behaviors include several topics including smoking, diet and exercise. Residents in disinvested and under-resourced communities are often most challenged to find the supportive services they need. Community Need Index (CNI) scores were used as a high-level assessment of the area's most at risk of health disparities. A high CNI score (3.4 to 5.0) is an indicator for socioeconomic variation, barriers to care, and an increased need for health care services. Sixty-eight ZIP Codes, or 26% of the region's 262 ZIP Codes, had high scores (3.4 to 5.0) indicating a likelihood of disparities in their experience, or lack, of health care. Hamilton County contained 27 of these ZIP Codes, and Montgomery County had 12 of them. Four of the 6 ZIP Codes in Adams County reflect high likelihood of health disparities. About one-third of counties in the region do not show high CNI scores. That does not mean that no disparity exists. There can be pockets of need in every county.

See Table 4 Community Needs Index Score for the Geographic Area.

Current service providers

Relevant service providers include Community Action Agency, Center for Closing the Health Gap, Hamilton County Job and Family Services, Talbert House, and Women Helping Women. See Table 5 List of Community Resources for a complete list of resources throughout the geographic area. Healthy behaviors encompass a broad range of health-related issues that are compounded by insufficient education and resources to those needing intervention; continuing the need in this category.

INFANT MORTALITY

There is black infant death crisis, evidenced by a more than three times rate of death for a black baby versus a white baby. Success in lowering infant mortality rates must address racial equity. In the U.S., there are 261 counties with populations greater than 250,000; in none of these communities is the Black infant mortality rate as low as the white rate. 66% of all sleep-related infant deaths in the past five years happened to black families (Hamilton County). Interventions and strategies to address infant mortality include imbedding community health workers, radical empathy toward racism through facilitated conversations, policy level change at the state and local level, place-based strategies at a neighborhood level, group prenatal care and reducing implicit bias in prenatal care.

Current service providers

Relevant service providers include Cradle Cincinnati, Health Care Access Now, Healthy Moms and Babes, Cincinnati Children's Hospital Medical Center, federally qualified health centers, prenatal providers and birthing hospitals. While deaths are declining for everyone, the gap locally and nationally is growing in racial disparity in infant deaths.

Cross Cutting Needs and Priorities

A key priority for Mercy Health Cincinnati is further exploration and intentional emphasis of cross-cutting priorities and at-risk populations. The state of Ohio's State Health Assessment (SHA) and State Health Improvement Plan (SHIP) planning process elevated the emphasis on equity and community conditions, noting many Ohioans lack opportunities to reach their full health potential with several groups experiencing much worse outcomes than the state overall. These groups include Ohioans who are black/African American, have lower incomes, have disabilities or live in Appalachian counties.

Mental health and addiction, chronic disease and maternal and infant health continue to be significant challenges in Ohio and stagnant or worsening trends among key health indicators further reinforce the need to address underlying drivers of health. The SHA names cross-cutting factors such as physical activity, tobacco use, access to dental and mental health care, income and unemployment, adverse childhood experiences, transportation, lead poisoning risk and racism. It also draws distinct attention to sharp disparities.

Among these disparities are:

- Premature death by race and ethnicity, with black/African American Ohioans bearing the greatest burden of shortened life spans.
- Ohioans with low incomes are more likely than Ohioans with higher incomes to report fair or poor health.
- African American women were less likely than all other racial and ethnic groups to receive prenatal care in the first trimester (62.7% vs. 78.6% for white women).
- There were similar disparities for birth outcomes; non-Hispanic black women had the highest rates of preterm birth and low birthweight births in 2017.
- Ohio's non-Hispanic black infant mortality rate in 2017 (15.8) was nearly three times as high as the non-Hispanic white rate.
- African Americans and Ohioans with disabilities or lower incomes experience particularly high rates of hypertension and diabetes.
- Rates of diabetes with long-term complications are highest for American Indian/Alaska Native, Hispanic and African American Ohioans, and asthma morbidity (as measured by emergency department visits) is almost three times higher for African-American children than for Ohio.

In order to be effective, Mercy Health must prioritize barriers to equity and social drivers as a point of consideration in the development of community health needs strategies. The dialogue is further supported by the regional CHNA. CHNA participants cited Poverty most often overall as a social determinant of health (SDH). The SDH category also included education, employment, environment (living conditions at home and/or hazards in the immediate community such as pollution or crime), violence, race, ethnicity, housing, homelessness, culture, and language. All four primary sources in regional CHNA the agreed on SDH as a barrier to child wellness. In this context, 80% of the SDH comments specified education. Among urban participants, 11% cited SDH as a top priority; housing and safety were mentioned most often. Moreover, social determinants of health were identified among the top non-financial barriers and the top unmet needs at the regional level.

Resources available

The existing healthcare facilities and other resources within the community that are available to meet the prioritized needs are listed in Table 5 at the end of this document.

See Table 5 List of Community Resources for a complete list of resources throughout the geographic area.

PROGRESS ON HEALTH PRIORITIES IDENTIFIED IN THE 2016 HEALTH NEEDS ASSESSMENT

THE JEWISH HOSPITAL

Initiative	Impact
Breast Cancer	<p>Goal: Increase the number of people screened for breast cancer by 5% each year.</p> <p>The hospital has increased the number of patients screened for breast cancer by 35% and has met its original goal.</p> <p>In 2018, 621 patients were provided with mammography screening compared to 459 in 2017. In 2017, the mobile mammography van screened 1038 patients for breast cancer.</p>
Lung Cancer	<p>Goal: Increase the number of people screened for lung cancer by 5% each year.</p> <p>In 2018, Jewish continued its efforts in screening clients for lung cancer and having follow-up screenings if need be. Many of whom that were screened were first time participants for lung cancer screenings. In 2017, 151 first time patients were screened.</p> <p>The team offered smoking cessation classes. In 2018, there were 46 participants in smoking cessation classes, of which 22 participates quit smoking by their target date in 2018. This was a significant increase in participants (4) and the number of participants who quit by their target quit date (2) in 2017.</p> <p>In 2018, the hospital hosted or sponsored 13 outreach activities that took place to educate, motivate and engage the community.</p>
Access to Care	<p>Goal: Increase the number of patients establishing a relationship with a primary care physician by creating a PCP for adults at Win Med FQHC in Bond Hill.</p> <p>Mercy began a Win Med FQHC in Bond Hill to offer more access to primary care physicians and demonstrate the value of offering additional resources for primary care in a primarily low-income population. In 2017, 2,448 patients were enrolled in a newly created FQHC in a community of need. In 2018, adult patients continued to enroll in the Win Med Clinic and 9 Mercy PCPs collaborated with Win Med in 2018.</p>

	<p>The FQHC clinic was moved to a level one facility in July 2017. This status was maintained in 2018.</p> <p>In 2018, 12 patients with pharmacy needs were enrolled in Win Med Clinic, and 629 patients were seen by Mercy pharmacists.</p> <p>The program expanded access to primary care services for adults at the FQHC in Bond Hill. In 2018, 650 adults who did not have a PCP visited Win Med FQHC.</p>
--	--

MERCY HEALTH ANDERSON HOSPITAL AND MERCY HEALTH CLERMONT HOSPITAL

Initiative	Impact
Substance Abuse	<p>Goal: Create an evidence based opiate withdrawal protocol based on the 11 parameter clinical opiate withdrawal scale appropriately use for patients admitted with medical illness, link to internal and external medication assisted therapy for opiate use disorder and rehabilitation.</p> <p>The team trained physicians and nurses on medically assisted therapy for opiate withdrawal.</p> <p>In 2017, 667 patient families were educated on abuse disorders.</p> <p>In 2018, 1,043 patients were enrolled in medically assisted treatments.</p>
Mental Health	<p>Goal: Augment identification of behavioral conditions prior to onset of chronicity, when problems are typically more severe and difficulty to treat (for patients, organizations and providers).</p> <p>The hospital continues to educate technicians, ED staff and providers on SBIRT protocol. In 2018, 18,789 patients were screened for depression, alcohol and drug use compared to 1,042 in 2017.</p> <p>In 2018, 1,139 brief interventions took place compared to 872 in 2017, and 1,043 referrals to treatment for other levels of care, special services, etc. were issued. This was higher than the benchmarks set in prior years.</p>
Access to Behavioral	<p>Goal: Augment access to behavioral healthcare (mental health and population health) by embedding behaviorists into the primary care setting. Increase the number and patient visits for behavioral health consultants embedded in primary</p>

<p>Health Services</p>	<p>care and increase the number and patient visits for psychiatrists embedded in primary care.</p> <p>In 2018, there were 8,289 visits for behavioral health consultants embedded in primary care, for which all were educated and served by Behavioral Health clinicians in 2018.</p> <p>Mercy continues to provide education and outreach to primary care providers in both formal and informal settings to increase access and awareness. In 2018, there were 6,399 visits for psychiatrists embedded in primary care (compared to 4,358 in 2017), and 4,316 of those patients were served for psychiatry (compared to 3,103 in 2017).</p> <p>A total of 115 medical providers were integrated in 2018.</p>
<p>Smoking Cessation & Lung Cancer</p>	<p>Goal: Improve the tobacco quit rate at end of smoking cessation program. Increase the number of lung screens completed by 5% each year.</p> <p>The hospital continues to offer daytime classes and/or one-on-one counseling for cessation with a focus to have participants quit by their target quit date and be ceased smokers at the 3-month date.</p> <p>In 2017, 547 lung cancer screenings were conducted.</p> <p>In 2018, 9 participants were referred to the Ohio Quit Line and 12 participants were coached by a Nurse Navigator.</p> <p>The team identified eligible participants for lung cancer screening. In 2018, there were 844 individuals who met the criteria and received lung cancer screening, 139 were identified as LRAD 3 or LRAD 4 (higher risk on scoring system) and 18 referred to a PCP.</p> <p>The team provided physician education to 6 PCP's during 2018.</p>
<p>Infant Mortality</p>	<p>Goal: Reduce infant mortality by educating mothers with knowledge for ABC Sleep Compliance. Provide each new born with a sleep sack.</p> <p>In 2018, Hamilton County saw fewer infant deaths than ever before with 92 deaths and an infant mortality rate of 8.6 compared to 9.0 in 2013 – 2017. In 2017, 1,782 mothers were educated on safe sleep practices.</p>

	<p>All patients were screened for potential need for a safe sleep surface through the A (alone), B (back), and C (crib) program. Mothers in our care continued to receive sleep audits during 2018.</p> <p>In 2018, 8 patients needed safe sleep surfaces.</p> <p>The team continued to provide families with identified needs, “ABC” sleep compliance equipment and supplies. In 2018, 851 babies received Sleep Sacks.</p> <p>In 2018, the team continued to educate mothers on safe sleep. In addition, written materials were given to each mother upon admission in her binder and reviewed by the RN.</p> <p>In 2018, the team continued ABC sleep education for PCPs.</p>
--	--

MERCY HEALTH FAIRFIELD HOSPITAL

Initiative	Impact
Infant Mortality	<p>Goal: Reduce infant mortality by educating mothers with knowledge for ABC Sleep Compliance. Provide each newborn with a sleep sack.</p> <p>All patients were screened for potential need for a safe sleep surface through the A (alone), B (back), and C (crib) program. In 2017, 100% of mothers received safe sleep audits while in hospital. In 2018, 25 patients needed safe sleep surfaces and 1,508 babies received Sleep Sacks.</p>
Smoking Cessation	<p>Goal: Improve the quit rate at the end of the smoking cessation program.</p> <p>Offered daytime classes and/or one-on-one counseling for cessation. In 2018, the hospital tripled its number of program participants from 9 in 2017 to 28 in 2018. 57% of the participants (16 of 28) quit by their initial quit date. This was a 13% increase from 2017, which had a 44% quit rate for their initial quit date.</p> <p>50% of the participants who quit by their initial date were smoke ceased at the 3-month date.</p> <p>23 participants were referred to the Ohio Quit Line, and 4 were coached by the Nurse Navigator in 2018.</p>
Lung Cancer	<p>Goal: Increase the number of lung cancer screenings by 5% each year.</p>

	<p>The team identified eligible participants for lung cancer screening. In 2017, 261 lung screenings were taken. In 2018, there were 205 individuals that were identified for screening. 104 individuals were identified as either LRAD 3 or LRAD 4 (higher risk on scoring system).</p> <p>The team provided physician education to 6 PCPs in 2018.</p>
--	--

MERCY HEALTH WEST HOSPITAL

Initiative	Impact
<p>Access to Care</p>	<p>Goal 2018: Reduce by 5% the number of Queen City Emergency Department (ED) patients who do not have a medical home/primary care physician (PCP).</p> <p>Mercy Health has reduced the number of patients presenting without a PCP by 35% from 15,920 patients in 2017 to 10,345 patients in 2018. This has exceeded the hospital’s goal of 5% reduction.</p> <p>The hospital provided a social work ED advocate to assist patients in establishing a medical home with a PCP. In 2018, 1,412 patients seen in the ED were matched or provided with a medical home. In 2018, West Hospital hired an advocate that secured 347 medical homes through the Health Partnership.</p> <p>In 2018, the hospital pilot tested a transportation strategy, and 267 patients received transportation assistance through the program.</p> <p>During 2018, met with PCPs to determine willingness and capacity to accept new patients and coordinate the transition. Worked towards launching an internal marketing plan to alert PCPs of this service.</p> <p>In 2018, Mercy Health initiated a partnership with a charitable pharmacy to ensure patients presenting in the ED with unmet medication needs were able to get immediate and long-term access to necessary drugs. In 2018, 102 drug vouchers were provided.</p>
<p>Healthy Behaviors</p>	<p>Goal: Increase the number of patient visits to the Wellness Center by 10% annually to reduce the number of severe cardiac episodes due to increased knowledge and motivation.</p>

	<p>The team assisted patients in establishing care with PCP. In 2017, 391 heart failure patients visited the Wellness Center. In 2018, 320 patients who had heart failure visited the clinic/Wellness Center.</p> <p>The team continued to assist patients with insurance enrollment.</p> <p>The team provided Heart Health Happy Hours. In 2018, there were 4 Heart Healthy Happy Hours.</p> <p>The team provided patients with 89 weight monitoring scales during 2018.</p>
<p>Infant Mortality</p>	<p>Goal: Reduce infant mortality by educating mothers with knowledge for ABC Sleep Compliance. Provide each new born with a sleep sack.</p> <p>In 2018, Hamilton County saw fewer infant deaths than ever before with 92 deaths and an infant mortality rate of 8.6 compared to 9.0 in 2013-2017.</p> <p>In 2017, 100% of OB staff were educated on safe sleep practices.</p> <p>All patients were screened for potential need for a safe sleep surface through the A (alone), B (back), and C (crib) program. In 2018, no patients needed safe sleep surfaces.</p> <p>Provided families with identified needs, “ABC” sleep compliance equipment and supplies. In 2018, 816 babies received Sleep Sacks.</p> <p>The team provided clinical social workers to help patients navigate the system, enroll in insurance, financial planning and access to health care. The social workers had 242 encounters with patients in 2018.</p> <p>PCPs and OB/GYNs were informed about ABC Sleep Education through 4 educational events in 2018.</p> <p>Continued enforcement of OB nurses obtaining CE’s regarding safe sleep practices during 2018.</p>
